About the Instructor

Dr. William Chen, DMD

Dr. William Chen received his undergraduate dental degree from Washington University School of Dental Medicine. He has authored a number of articles on dental lasers and lectures nationally and internationally.

Dr. Chen is a co-founder of the World Clinical Laser Institute and serves on their advisory board. His other honors and memberships include: Fellowship & Mastership of the Academy of General Dentistry, Mastership & Educator of the Academy of Laser Dentistry, Mastership of the World Clinical Laser Institute, Fellow of the American College of Dentists and Fellow of the International College of Dentists.

He was the chief investigator for BIOLASE in getting FDA clearance for complete laser root canal therapy and bone applications. He is the founder and director of the Chen Laser Institute, an international laser education and training organization.

He is on staff at St. Elizabeth Hospital and is a visiting professor at Columbia University, the University of Genoa and the University of Rome.

He maintains a private dental practice in Granite City, IL.

Who Should Attend?

This course has been designed for dentists and hygienists who wish to obtain certification in dental lasers or those who wish to improve their knowledge.

Course Description

This course will train the dental practitioner in the basics of using lasers in dentistry. The practitioner will become acquainted with laser procedures currently used in dentistry and with scientific basis for laser use in dentistry. Introduction to all laser devices currently available for dental use will be discussed, in addition to laser safety and operation.

Course Objective

- To learn the fundamentals of lasers
- To review the types of lasers, delivery systems, and device characteristics
- To review the clinical applications of lasers
- To learn laser safety
